

Functional Requirements Document (FRD)

Project: Real-Wallet Teen Patti & Casino System

1. Executive Summary

This FRD defines the requirements for a multi-platform real-wallet based card game system (Teen Patti & Roulette) supporting Android/iOS apps and a web portal.

The system allows users to play using virtual coins, while all real-money interactions are handled manually by the admin.

It also includes:

- A landing page for marketing and APK downloads
 - A contact form for subscriptions on the website
 - Legal disclaimers & user consent flow before gameplay
-

2. Platforms & Scope

The project will be developed for:

- Mobile App: Android & iOS
- Web Application: Responsive web version for all browsers

Common Backend:

- Single backend (Node.js + MongoDB preferred)
 - Unified wallet, authentication, and game APIs
 - Admin panel accessible via web
-

3. Website Features

Landing Page

- Highlights the brand, features, and how to play.
- Sections:
 - Game overview (Teen Patti & Roulette)
 - Subscription plans (with comparison table)
 - Contact form for subscription inquiries
 - “Download App” buttons (APK for Android / Link for iOS / Play on Web)
- Optional: Testimonials, FAQ, and Company info.

Subscription Contact Form

- Simple form fields: Name, Phone, Email, City, Message
- Submits directly to admin dashboard
- Admin can view & respond to subscription leads manually

4. App Features (Mobile & Web Game Portal)

- Login/Register
 - Play Practice or Real Game
 - Wallet balance view
 - Transfer coins (subscribed users)
 - Subscription upgrade flow
 - Disclaimer & Terms acceptance screen (first login)
-

5. Disclaimer & User Agreement Flow

Before any gameplay or wallet access:

1. System displays a Disclaimer Popup/Screen with clear terms.
2. User must check “I Agree” before proceeding.

Example Disclaimer:

 *Disclaimer:*

This platform is for entertainment purposes only.

Any coins or money used here are not refundable or recoverable.

Real cash transactions happen manually and outside the app.

The company or its developers are not responsible for any money losses, misuse, or unauthorized payments.

By continuing, you confirm that you are 18+ and you agree to these terms.

If user declines → game dashboard remains inaccessible.

6. User Types & Permissions

Normal User (Free User)

- Does not invest or use real money.
- Can play trial/practice mode only.
- Starts with 50 free coins (for testing).
- Once 50 coins are used → system shows a Subscription offer screen.
- Cannot view other users' cards or perform any wallet transactions.
- Cannot play Roulette or any real-coin game.

Subscribed User (Paid User)

- Can play real-coin games like Teen Patti and Roulette.
- Has an active wallet storing virtual coins/credits.
- Can perform wallet-to-wallet chip transfers.
- Real money exchange occurs outside the system (admin collects cash manually).
- Has enhanced privileges (Show and Exchange options, Roulette access).

7. Game Modules

Teen Patti Game:

- Available for both user types (Normal → trial mode, Subscribed → real mode).
- Show button usable only once per game.
- Card Exchange option usable only once per game.
- Payout: 40% commission to company, 60% to winner.

Roulette Game:

- Exclusive to subscribed users.
- Uses same wallet and commission logic.

8. Wallet & Transactions

- Wallet stores coins (credits), representing real money.
- Only coins circulate within the system.
- All coin additions/removals are performed by Admin only.

9. Subscription Flow

- User clicks “Get Subscription” → Request sent to Admin.
- Admin contacts user manually and collects cash.
- Admin credits coins manually.
- User becomes Subscribed.

10. Withdrawal Flow

- User sends a Withdraw Request.
- Admin verifies manually and pays cash in-hand.
- Admin marks transaction completed and deducts coins.

11. Admin Panel Features

- View users (name, coins, contact, subscription status).
- Add/Remove coins.
- Approve subscriptions & withdrawals.
- View reports and transaction logs.
- Manage commission percentage.

12. Non-Functional Requirements

Performance – Real-time updates using WebSockets.

Scalability – Support for 10,000+ concurrent players.

Security – Token authentication, admin-only controls.

Manual Verification – No automated money movement.

Audit Trail – Logs for all activities.

13. Data Model

Users Table: user_id, name, phone, user_type, coins, subscription_status, created_at

Transactions Table: txn_id, from_user, to_user, amount, type, date

Game Logs Table: game_id, type, winner_id, commission, winnings, date

14. Risk & Mitigation

Fraudulent claims → Manual verification before coin credit.

Uncontrolled money circulation → Admin-only controls.

Server crash → Auto rollback using wallet state.

Data tampering → Logs & admin privileges.

15. MVP Scope

- Teen Patti real-wallet gameplay
- Practice mode (50 free coins)
- Admin panel
- Wallet system
- Manual subscription & withdrawal

16. Future Enhancements

- Automated payment gateways
- Referral system
- Multi-language support
- Android/iOS apps
- AI-based fraud detection

Summary:

This FRD defines the complete functional and non-functional flow for the Real Wallet Teen Patti & Casino System, ensuring manual control of financial operations, compliance safety, and transparent wallet logic between users and admin.
